Speakers

Amir Kaplan

Co-founder and Chief Executive Officer at ifeel

Amir Kaplan is the co-founder and Chief Executive Officer at ifeel. Over the years Amir led the company strategy, go-to market, fundraising and commercial activity to position ifeel as a leading solution for global brands in 26 countries. Prior to founding ifeel, Amir gained managerial experience as a combat commander in the IDF (Israeli Defense Forces) and worked with publicly traded companies as a senior consultant at KPMG. Amir holds a certified public accountant certificate, studied economics and holds an MBA degree. Today Amir is leading ifeel global strategy through partnerships with insurance companies, healthcare and employee benefit organizations around the world and is vocal about mental health and technology as the driver of a better future. In his private life Amir likes diving, surfing, skateboarding, motorbiking and traveling to new countries. He is a proud father of 2 kids.

Speakers

Gabriele Murrone

Co-founder and Chief Product Officer at ifeel

Gabriele Murrone is the co-founder and Chief Product Officer at ifeel. Over the course of the years, Gabriele has been responsible for scaling the ifeel product from a B2C chat with psychologists to an all-rounded mental health operating system for global insurance companies and healthcare organizations worldwide. Prior to founding ifeel, Gabriele earned three university degrees (including an MBA) in three different countries and had extensive professional experience in management consulting, leading key projects for international clients in Italy, USA and South-East Asia. Today Gabriele is committed to democratize mental health care by crafting solutions at ifeel that allow effective mental health care management at scale. In his private life, besides being a football and two-wheel enthusiast, Gabriele is the proud and sleepless father of Vera, a 8-month old pirate disguised as a fairytale princess.

Speakers

Nick Sanscartier

Solutions Engineer at Novisto

Nick's career trajectory is a remarkable one, driven by his unwavering passion and expertise in the field of environmental, social, and governance (ESG). After a brief stint at a wealth management startup, Nick embarked on a backpacking tour around the world, seeking inspiration and new experiences. Fate led him to London, where he joined Bloomberg and quickly recognized the potential of ESG as an emerging area of business. Nick worked across various departments including product, sales, and data functions, ultimately carving out an ESG niche for himself. His final position at Bloomberg was as an ESG Research Associate, where he made notable contributions to the field by publishing research and building models. It was during this time that Nick realized the ultimate limiting factor to sustainability integration would be data reporting and transparency, leading him to connect with Novisto, a company that shared his vision and values. As a Solutions Engineer at Novisto, Nick leverages his extensive experience in ESG research and data analysis to help some of the largest global companies deploy ESG strategies and transition to more sustainable investments, using technology and quantitative solutions.
