

SCOR
The Art & Science of Risk

Let's **empower** **healthier lives** together

Today's consumers are health conscious, technology savvy, and want the freedom to choose, but the insurance industry often struggles to keep up. At SCOR, we are passionate about developing solutions that meet the needs of the next generation of consumers. And that's why we've partnered with key players in the wearable technology industry to develop the Biological Age Model (BAM). Making the most of wearable data, BAM not only continuously assesses how we are living, but empowers and coaches us to make the right choices to live healthier lives.
