Clinical API

Integrate our unified Clinical API into your digital health products and solutions and connect to 85% of U.S. hospitals, electronic health records, pharmacies, and labs.

Wearable API

Power your wellness platform with one Wearable API that connects to 300+ wearable devices and fitness apps.

What Our Customers are saying...

"When evaluating data vendors, we prioritized those with strong reach in the provider community, and were happy to select Human API. The company's products are easy to use, and it's exciting to see them continuing to grow their network. The winning combination of strong patient data sets, and an intuitive interface, demonstrates Human API is moving in the right direction as it expands."

- Sean Duffy, Co-Founder & CEO of Omada Health
